University of Bath - Basic Income Research

All adults aged 18-75 in the United Kingdom

UB01. Assuming the level would be set roughly at the amount the UK government judged to be necessary to cover basic needs, e.g. food and clothing (but not housing costs), to what extent would you support or oppose the UK Government introducing a basic income... - if it meant cuts in welfare benefits spending from their current levels?

UB01. Assuming the level would be set roughly at the amount the UK government judged to be necessary to cover basic needs, e.g. food and clothing (but not housing costs), to what extent would you support or oppose the UK Government introducing a basic income... - if it meant both an increase in taxes and cuts in welfare benefits spending from their current levels?

UB03. Below are some arguments people have made in favour of introducing a basic income. Regardless of whether you support or oppose the UK Government introducing a basic income, how convincing, if at all, do you personally find each of these? - Summary

All Adults aged 18-75 in the UK

	UB03. Below are some arguments people have made in favour of introducing a basic income. Regardless of whether you support or oppose the UK Government introducing a basic income, how convincing, if at all, do you personally find each of these?					
	Job security is increasingly a problem for many people...	Advances in technology and automation will mean that, in the future, many people might lose their jobs...	Conditions attached to welfare benefits and penalties for not meeting these are unfair and harsh...	The current welfare system is very bureaucratic...	Many people do very important work that is unpaid, such as caring or other voluntary work...	Many unemployed people do not have an incentive to find a job...

**All adults aged 18-75 in the United Kingdom**

UB03. Below are some arguments people have made in favour of introducing a basic income. Regardless of whether you support or oppose the UK Government introducing a basic income, how convincing, if at all, do you personally find each of these? - Advances in technology and automation will mean that, in the future, many people might lose their jobs and may be unable to find another job easily. A basic income would be a good way of dealing with this by providing a guaranteed income.

UB03. Below are some arguments people have made in favour of introducing a basic income. Regardless of whether you support or oppose the UK Government introducing a basic income, how convincing, if at all, do you personally find each of these? - Conditions attached to welfare benefits and penalties for not meeting these are unfair and harsh. A basic income would ensure nobody fell below an adequate standard of living.

UB03. Below are some arguments people have made in favour of introducing a basic income. Regardless of whether you support or oppose the UK Government introducing a basic income, how convincing, if at all, do you personally find each of these? - Conditions attached to welfare benefits and penalties for not meeting these are unfair and harsh. A basic income would ensure nobody fell below an adequate standard of living.

UB03. Below are some arguments people have made in favour of introducing a basic income. Regardless of whether you support or oppose the UK Government introducing a basic income, how convincing, if at all, do you personally find each of these? - The current welfare system is very bureaucratic with programmes that help the wrong people or no one at all. A basic income would reduce bureaucracy and make the system more transparent.

UB03. Below are some arguments people have made in favour of introducing a basic income. Regardless of whether you support or oppose the UK Government introducing a basic income, how convincing, if at all, do you personally find each of these? - Many people do very important work that is unpaid, such as caring or other voluntary work. A basic income would be a way of rewarding and encouraging others to do this type of work.

UB03. Below are some arguments people have made in favour of introducing a basic income. Regardless of whether you support or oppose the UK Government introducing a basic income, how convincing, if at all, do you personally find each of these? - Many unemployed people do not have an incentive to find a job because benefits they may currently be receiving are withdrawn. As everyone would receive it, a basic income would encourage unemployed people to get a job by allowing them to keep that basic income if they find work.

UB03. Below are some arguments people have made in favour of introducing a basic income. Regardless of whether you support or oppose the UK Government introducing a basic income, how convincing, if at all, do you personally find each of these? - Many unemployed people do not have an incentive to find a job because benefits they may currently be receiving are withdrawn. As everyone would receive it, a basic income would encourage unemployed people to get a job by allowing them to keep that basic income if they find work.
