

# Responding to COVID-19 in African Member States:

Data Deck of Polling Results: Cote d'Ivoire

---

March 2021

## INTRODUCTION

This deck provides the survey results for Cote d'Ivoire and should be used as a reference document.

This is the third poll and analysis conducted since the pandemic began. The first poll occurred in May 2020, and the second in August 2020. Results of the second survey (S2) are provided for tracking purposes against the third survey (S3) where the questions are comparable. Results from the first poll are not included as the first poll was done in urban centers only and cannot be compared to the national polls conducted in the second and third polls.

The published reports for the current and prior surveys can be found here:

<https://preventepidemics.org/covid19/perc/>

## METHODOLOGY

This third public opinion poll in Cote d'Ivoire was conducted from 13 February to 23 February 2021.

The polling was conducted by telephone. Samples were drawn to be nationally representative of each Member State with access to a landline or cell phone. Weighting was applied by gender and region to align the final data with the population.

The unweighted national sample size in Cote d'Ivoire is 1,397 interviews. The weighted national sample size is 1,200 interviews.

The regional comparison for Cote d'Ivoire is the Western region.

# Socio Demographic Table

	Country	Sex		Age					Urbanicity	
	Total	Male	Female	18-25	26-35	36-45	46-55	56+	Urban	Rural

# Behavior & protective measures

# 11

# Contact with others: in household

Q27. Over the last 24 hours how many people have you had contact with? Please include people you have been within two meters of and exchanged at least a few words OR had physical contact with. Please do not include people whom you have only passed by on the street, while using public transportation, or in a market without speaking to. We would like you to think about the following settings...?

a) People within your household (INTERVIEWER: This means people within the respondents' household, not visitors)

					Gender		Age					Household location		Monthly Income		Children Under age 5 in Household		Missed Health Care Visit
