In 2021, the federal government expanded access to medical assistance in dying (MAID) for adults to include those with a physical illness but whose death was not reasonably foreseeable. The government is now including those with a grievous and irremediable mental disorder and whose suffering is intolerable. However, it has been suggested by some that only patients experiencing physical illnesses and conditions should be extended the option of MAID and that those solely with a mental disorder should not be able to access medical assistance in dying. Do you agree or disagree with the following statement: With appropriate safeguards in place, an adult with the capacity to provide informed consent should be able to seek an assessment for medical assistance in dying for a severe, treatment-resistant mental disorder for which they experience intolerable suffering.
