PUBLIC  
Immigration  
Adults aged 18-75 in GB

Q14. The term 'net migration' is used to describe the difference between the number of people who have migrated to Britain, minus the number of people who have left Britain. For example, if 100 people moved to Britain and 50 people left Britain in a given year, Britain would have had a net migration of 50 people. Do you think the net migration into Britain has increased compared to last year, do you think it has decreased, or do you think it's stayed the same?  
All Adults aged 18-75 in GB
