

### **Ipsos Poll on Abortion Attitudes**

Conducted by Ipsos using KnowledgePanel® A survey of the American adult general population (ages 18+)

> Interview dates: June 9-11, 2023 Number of interviews: 1,017 Number of Republican interviews: 268 Number of Democrat interviews: 334 Number of Independent interviews: 315

Margin of error: +/- 3.3 percentage points at the 95% confidence level for all respondents Margin of error: +/- 6.2 percentage points at the 95% confidence level for Republican respondents

Margin of error: +/- 5.6 percentage points at the 95% confidence level for Democrat respondents Margin of error: +/- 5.7 percentage points at the 95% confidence level for Independent respondents

NOTE: All results show percentages among all respondents, unless otherwise labeled. Reduced bases are unweighted values.

NOTE: \* = less than 0.5%, - = no respondents

#### **Annotated Questionnaire:**

BIG1\_Sum1. When it comes to the following issues, how much do you approve or disapprove of how lawmakers in your state have handled these topics over the last year? - Summary - Approve

	Total June 2023	Total January 2023
	(N=1,017)	(N=1,005)
Abortion	44%	48%
Taxes	42%	40%
Laws that affect LGBTQ people	46%	52%
Education	48%	51%
Infrastructure / transportation	53%	54%
Crime	41%	41%
Guns and gun control	41%	43%
Public health & COVID	59%	56%

### **About the Study**

These are the findings of an Ipsos poll conducted June 9-11, 2023, by Ipsos using our KnowledgePanel®. This poll is based on a nationally representative probability sample of 1,017 general population adults aged 18 or older. The sample includes 268 Republicans, 334 Democrats, and 315 Independents.

The survey was conducted using KnowledgePanel, the largest and most well-established online probability-based panel that is representative of the adult US population. Our recruitment process employs a scientifically developed addressed-based sampling methodology using the latest Delivery Sequence File of the USPS – a database with full coverage of all delivery points in the US. Households invited to join the panel are randomly selected from all available households in the U.S. Persons in the sampled households are invited to join and participate in the panel. Those selected who do not already have internet access are provided a tablet and internet connection at no cost to the panel member. Those who join the panel and who are selected to participate in a survey are sent a unique password-protected log-in used to complete surveys online. As a result of our recruitment and sampling methodologies, samples from KnowledgePanel cover all households regardless of their phone or internet status and findings can be reported with a margin of sampling error and projected to the general population.

The study was conducted in English. The data were weighted to adjust for gender by age, race/ethnicity, education, household income, Census region, metropolitan status, and 2020 vote choice. The demographic benchmarks came from the 2022 March Supplement of the Current Population Survey (CPS). The 2020 vote choice benchmarks came from the Federal Election Commission's Official 2020 Presidential General Election Results.

- Age (18-29, 30-44, 45-59, 60+) by Gender (Male, Female)
- Race/ethnicity (White, Non-Hispanic; Black, Non-Hispanic; Other/2+ races, Non-Hispanic; Hispanic
- Education (Less than High School, High School graduate, Some College, Bachelor or higher)
- Household Income (Under \$25,000; \$25,000-\$49,999; \$50,000-\$74,999; \$75,000-\$99,999; \$100,000-\$149,999; \$150,000 and over)
- Census Region (Northeast, Midwest, South, West)
- Metropolitan Status (Metro, non-Metro)
- 2020 Vote Choice (Biden, Trump, All other/Did not vote)

The margin of sampling error is plus or minus 3.3 percentage points at the 95% confidence level, for results based on the entire sample of adults. The margin of sampling error takes into account the design effect, which was 1.13. The margin of sampling error is higher and varies for results based on sub-samples. The margin of sampling error for the Republicans is plus or minus 6.2 percent, with a design effect of 1.08. The margin of sampling error for the Democrats is plus or minus 5.6 percent, with a design effect of 1.08. The margin of sampling error for the independents is plus or minus 5.7 percent, with a design effect of 1.08. In our reporting of the findings, percentage points are rounded off to the nearest whole number. As a result, percentages in a given table column may total slightly higher or lower than 100%. In questions
