Q2218. At the moment, responsibility for public health is shared between the government and local authorities. This means local authorities have limited powers to implement policies that limit harm from alcohol, tobacco, and unhealthy food. Some experts think local authorities should have more power to implement these policies, so they can be tailored to address the needs of the local population. Others say these decisions should stay as the responsibility of national government, so policies address the needs of the whole population. To what extent do you support or oppose local authorities having more responsibility for implementing policies to reduce harm from tobacco, alcohol, and unhealthy food?

Q2218. At the moment, responsibility for public health is shared between the government and local authorities. This means local authorities have limited powers to implement policies that limit harm from alcohol, tobacco, and unhealthy food. Some experts think local authorities should have more power to implement these policies, so they can be tailored to address the needs of the local population. Others say these decisions should stay as the responsibility of national government, so policies address the needs of the whole population. To what extent do you support or oppose local authorities having more responsibility for implementing policies to reduce harm from tobacco, alcohol, and unhealthy food?
