Methodology

These are findings of an online Ipsos poll conducted on behalf of the Montreal Economic Institute.

A sample of 1,116 Canadian residents aged 18 years and over, with an oversample of residents in Quebec (n=406) was interviewed online between March 22nd and 27th, 2024.

Weighting and quotas according to age, gender, region and language were employed to ensure that the sample's composition reflects the overall population according to the latest census information.

The precision of Ipsos online polls is measured using a credibility interval. In this case, the results are accurate to within +/- **3.3 percentage points, 19 times out of 20**, of what the results would have been had all Canadian adults been polled.

Key Findings

1

Less than half (48%) of Canadians are **satisfied with their provincial healthcare system**, similar to 2023 figures. Satisfaction is lowest among residents of Atlantic Canada (30%).

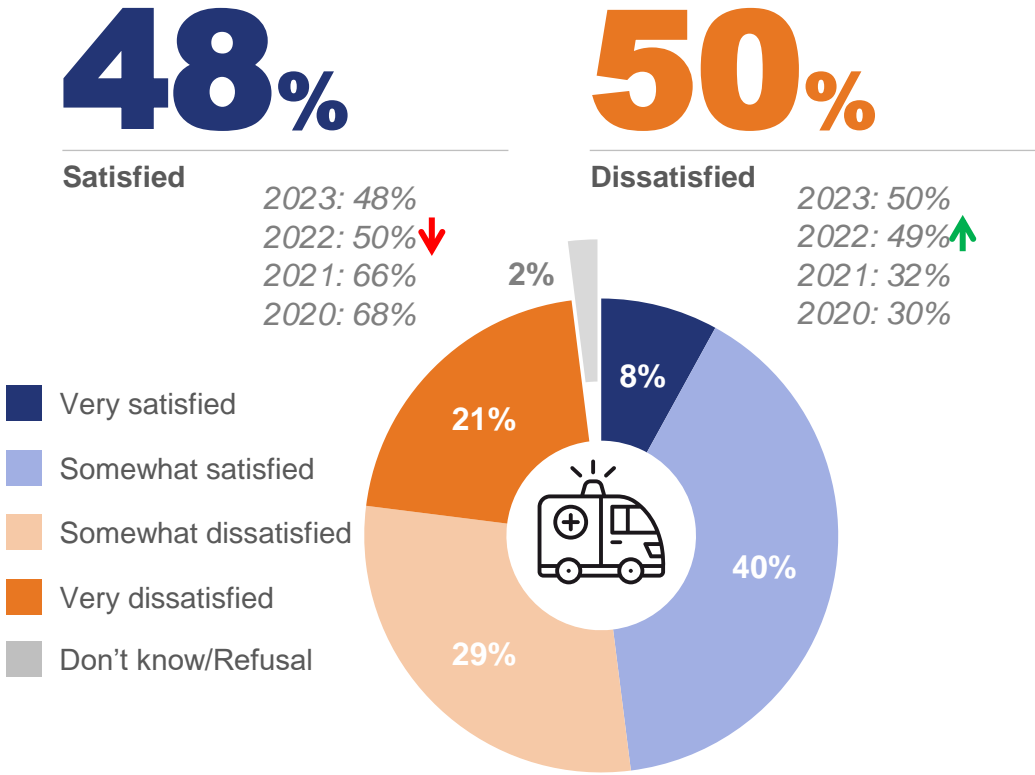

2

More than three-quarters of Canadians (78%) believe **their provincial healthcare system is too bureaucratic**, a proportion which is higher among those aged 55 and over (83%) and residents of Quebec (87%), as in 2023.

3

Seven in ten Canadians (70%) believe that **private entrepreneurs can deliver healthcare services faster than hospitals managed by the government**, with those residing in Quebec (77%) most likely to think this way.

Less than half (48%) of Canadians are satisfied with their provincial healthcare system, similar to 2023 figures.

Satisfaction with province's healthcare system

Q1. In general, are you satisfied or dissatisfied with your province's healthcare system?
 Base: All respondents 2024: (n=1,116), 2023: (n=1,164), 2022: (n=1,174), 2021: (n=1,168), 2020: (n=1,150).

↑ ↓ Significantly higher or lower compared to previous wave

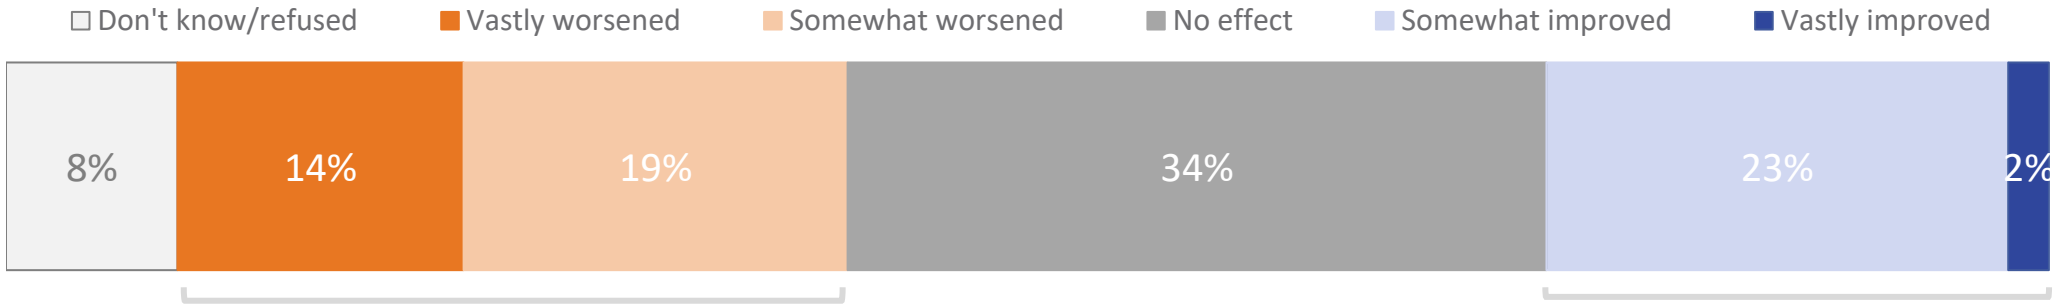

Satisfaction with the provincial health system by socio-demographic group

Women (55%) tend to be more dissatisfied than men (44%), which is also the case for residents of Atlantic Canada (67%).

	Total	Age			Gender		Region					
		18-34	35-54	55+	Male	Female	BC	AB	SK/MB	ONT	QC	ATL
		A	B	C	D	E	F	G	H	I	J	K
Satisfied (Very/Somewhat)	47.9%	46.2%	43.1%	53.2% B	53.4% E	42.6%	44.1%	44.2%	50.1% K	53.4% K	47.3% K	30.0%
Dissatisfied (Very/Somewhat)	49.7%	51.8%	52.9% C	45.5%	43.7%	55.4% D	53.5%	53.1%	49.9%	43.4%	51.2% I	67.2% IJ

Only a quarter of Canadians (25%) think additional public funds injected in the healthcare system over the past ten years led to improvements.

33%

Worsened

2023: 30%
 2022: 33% ↑
 2021: 19%
 2020: 17%

25%

Improved

2023: 24%
 2022: 21% ↓
 2021: 34%
 2020: 37%

Q2. In your opinion, have the additional amounts injected into the healthcare system over the past ten years by the government of your province improved the healthcare system?
 Base: All respondents 2024: (1,116), 2023: (n=1,164), 2022: (n=1,174), 2021: (n=1,168), 2020: (n=1,150).

↑ ↓ Significantly higher or lower compared to previous wave

Improvement of the healthcare system by socio-demographic group

Women (36%) are more likely to have noticed a deterioration of the healthcare system.

	Total	Age			Gender		Region					
		18-34	35-54	55+	Male	Female	BC	AB	SK/MB	ONT	QC	ATL
		A	B	C	D	E	F	G	H	I	J	K

Game Changers

In our world of rapid change, the need for reliable information to make confident decisions has never been greater.

At Ipsos we believe our clients need more than a data supplier, they need a partner who can produce accurate and relevant information and turn it into actionable truth.

This is why our passionately curious experts not only provide the most precise measurement, but shape it to provide True Understanding of Society, Markets and People.

To do this we use the best of science, technology and know-how and apply the principles of security, simplicity, speed and substance to everything we do.

So that our clients can act faster, smarter and bolder. Ultimately, success comes down to a simple truth:
You act better when you are sure.
