## TOPLINE & METHODOLOGY

### About the Study

This Ipsos poll was conducted August 21-28, 2024 on behalf of Reuters using the KnowledgePanel®. This poll is based on a representative sample of 4,253 U.S. residents, age 18 or older.

The study was conducted in English. The data were weighted to adjust for gender by age, race/ethnicity, Census region, metropolitan status, education, household income, and party ID. Party ID benchmarks are from the 2024 NPORS annual survey. The demographic benchmarks came from the 2023 March Supplement of the Current Population Survey (CPS). The weighting categories were as follows:

- Gender (Male, Female) by Age (18-29, 30-44, 45-59, 60+)
- Race-Ethnicity (White/Non-Hispanic, Black/Non-Hispanic, Other/Non-Hispanic and 2+ Races/Non-Hispanic, Hispanic)
- Census Region (Northeast, Midwest, South, West)
- Metropolitan Status (Metro, Non-Metro)
- Education (High School graduate or less, Some College, Bachelor or higher)
- Household Income (under \$25K, \$25K-\$49,999, \$50K-\$74,999, \$75K-\$99,999, \$100K-\$149,999, \$150K and over)
- Party ID (Democrat, Lean Democrat, Republican, Lean Republican, Independent/Something else)

The margin of sampling error is plus or minus 1.6 percentage points at the 95% confidence level, for results based on the entire sample of adults. The margin of error takes into account the design effect, which was 1.11 for all adults. The margin of sampling error is plus or minus 1.7 percentage points for registered voters. In our reporting of the findings, percentage points are rounded off to the nearest whole number. As a result, percentages in a given table column may total slightly higher or lower than 100%. In questions that permit multiple responses, columns may total substantially more than 100%, depending on the number of different responses offered by each respondent.
