

GLOBAL INFRASTRUCTURE INDEX 2024

32 country study, 24 May – 7 June 2024

Global Summary

In partnership with:

© Ipsos | Global Infrastructure
Index 2024

SATISFACTION & ATTITUDES

A higher proportion are satisfied with infrastructure than are not, but many are unsure

Q. We now want you to think about [COUNTRY'S] infrastructure. By infrastructure we mean things we rely on like road, rail and air networks, utilities such as energy and water, and broadband and other communications.

Overall, how satisfied or dissatisfied are you with [COUNTRY'S] national infrastructure?

Base: 23,530 adults (online), 32 countries
May-June 2024

Global Country Average*

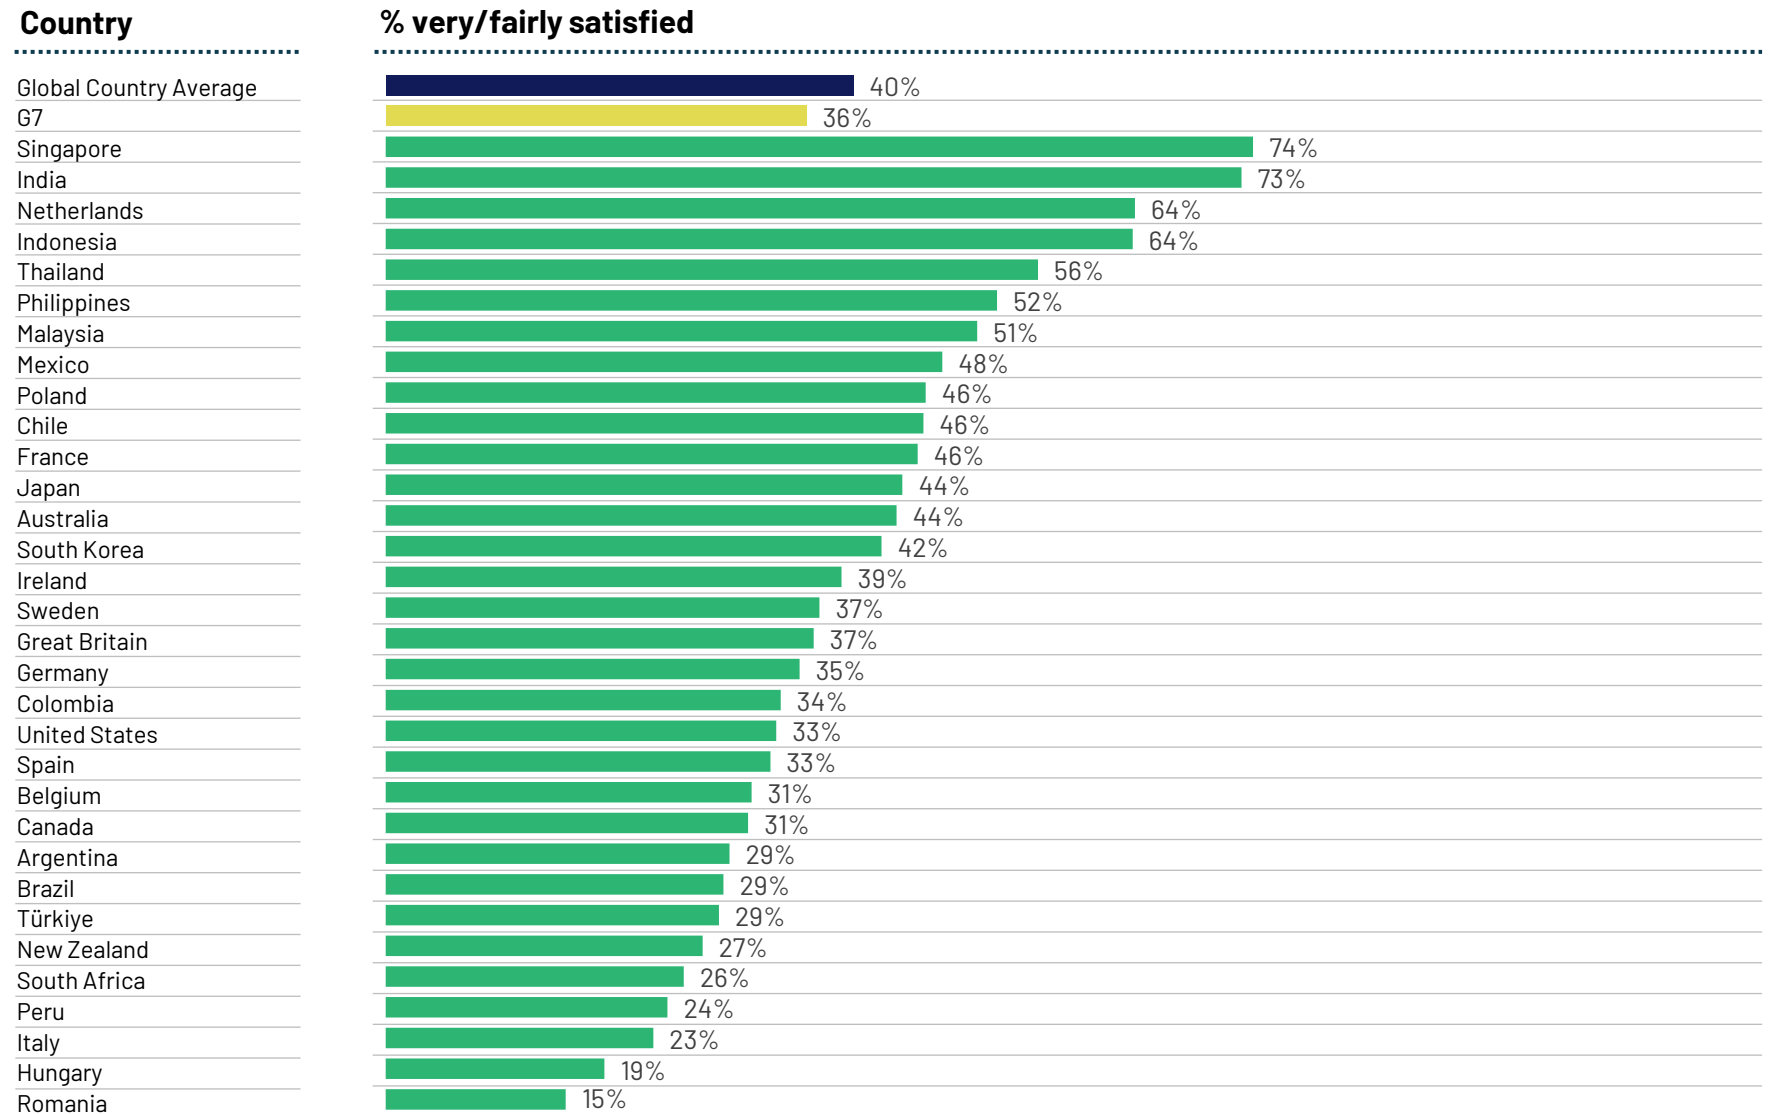

* N.B. "The Global Country Average" reflects the average result for all the countries and markets in which the survey was conducted. It has not been adjusted to the population size of each country or market and is not intended to suggest a total result. The number of countries involved has changed over time e.g. 26 in 2016, 32 in 2024

There is considerable variation in satisfaction across the 32 countries

Q. We now want you to think about [COUNTRY'S] infrastructure. By infrastructure we mean things we rely on like road, rail and air networks, utilities such as energy and water, and broadband and other communications.

Overall, how satisfied or dissatisfied are you with [COUNTRY'S] national infrastructure?

Base: 23,530 adults (online), 32 countries
May-June 2024

Satisfaction is relatively higher in APAC but similar elsewhere

Q. We now want you to think about [COUNTRY'S] infrastructure. By infrastructure we mean things we rely on like road, rail and air networks, utilities such as energy and water, and broadband and other communications.

Overall, how satisfied or dissatisfied are you with [COUNTRY'S] national infrastructure?

See **Appendix** for note on regional classifications. Number of countries and aggregate base size in each region shown in ().

Base: 23,530 adults (online), 32 countries
May-June 2024

Longer-term trends: Satisfaction dipped in 2018 but bounced back during early pandemic period then fell back to 2019 levels

Q. We now want you to think about [COUNTRY'S] infrastructure. By infrastructure we mean things we rely on like road, rail and air networks, utilities such as energy and water, and broadband and other communications.

Overall, how satisfied or dissatisfied are you with [COUNTRY'S] national infrastructure?

Base: 23,530 adults (online), 32 countries
May-June 2024

PRIORITIES

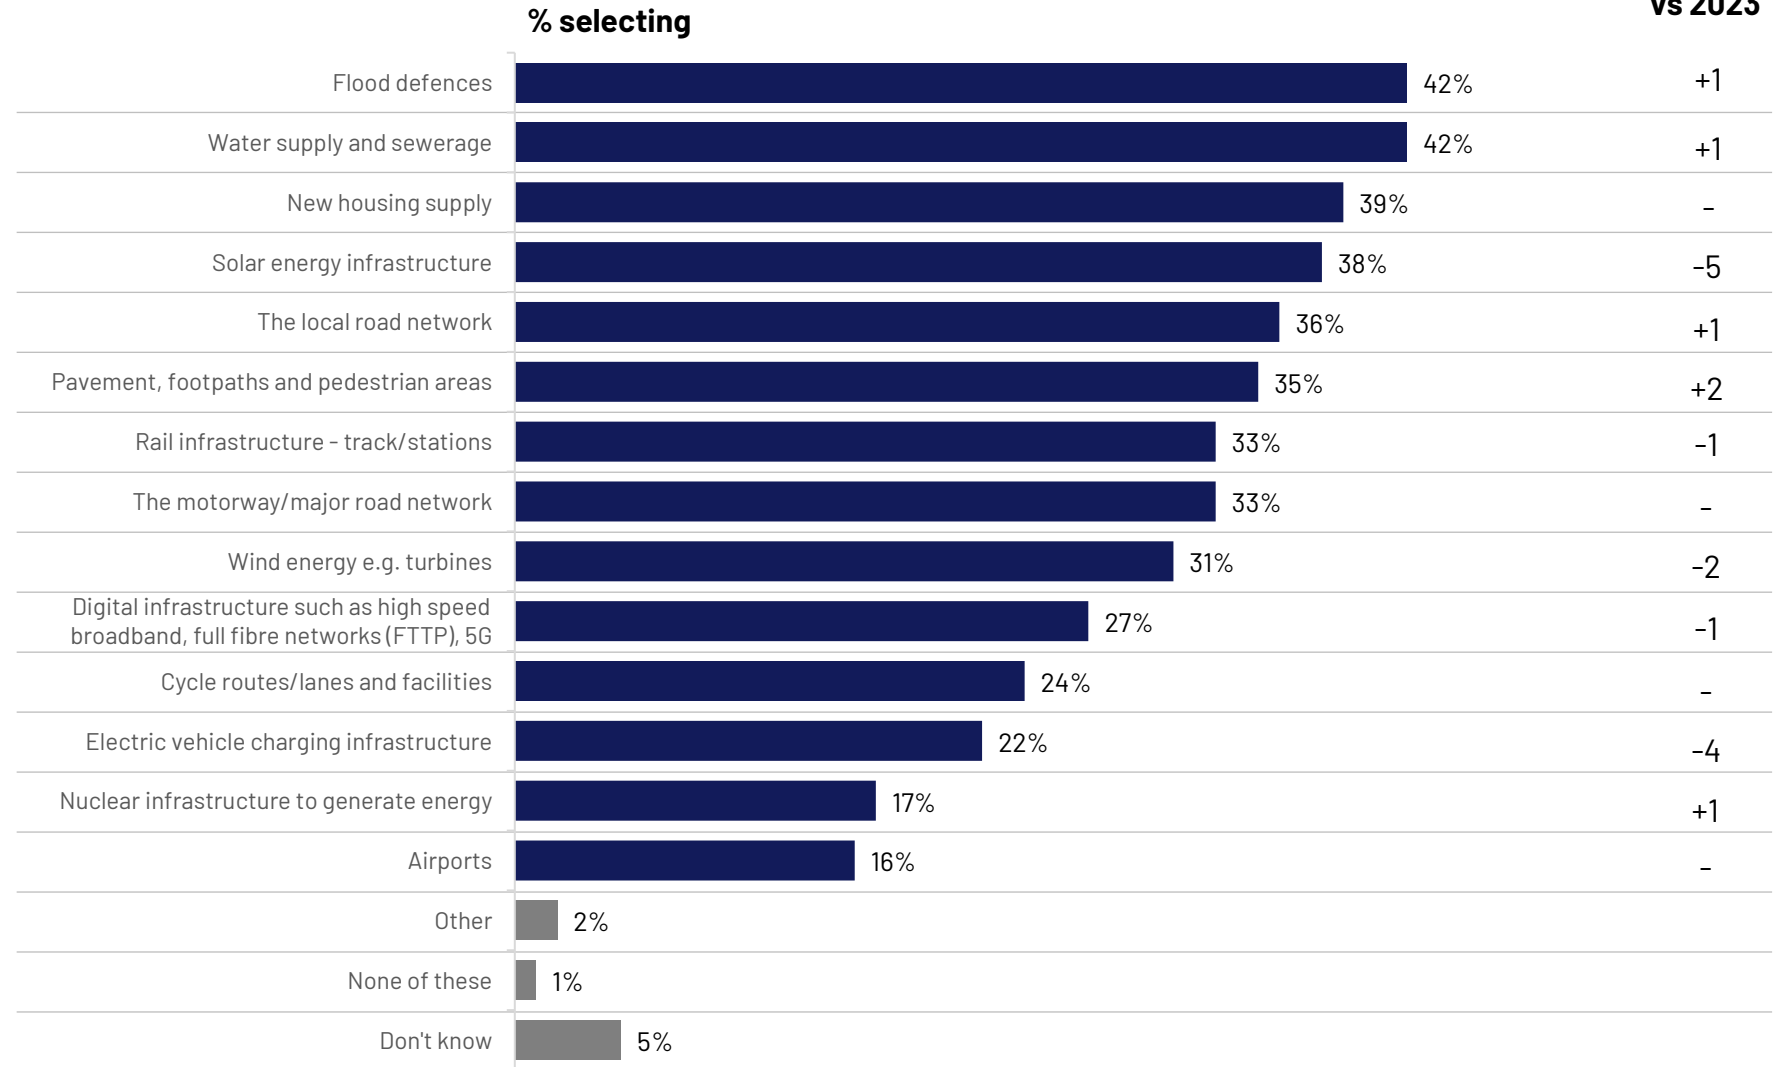

Across the 32 countries, flood defences and water supply/sewerage are top priorities, but not by much

Q. Which of these types of infrastructure, if any, do you think should be made a priority for investment for [COUNTRY]?

Base: 23,530 adults (online), 32 countries
May-June 2024

Global Country Average

Across the 32 countries, citizens have the same top four priorities, although the order has changed slightly

Q. Which of these types of infrastructure, if any, do you think should be made a priority for investment for... [COUNTRY]?

* Digital infrastructure such as high speed broadband, full fibre networks (FTTP), 5G
Base: 22,816 adults (online), 31 countries, May-June 2023

Water supply/ sewerage is clear top in Britain

Q. Which of these types of infrastructure, if any, do you think should be made a priority for investment for Great Britain?

Base: 23,530 adults (online), 32 countries
May-June 2024 - 1,001 in GB

In Britain, there has been a significant increase in the priority attached to water supply/ sewerage

Q. Which of these types of infrastructure, if any, do you think should be made a priority for investment for Great Britain?

Base: 23,530 adults (online), 32 countries
May-June 2024 - 1,001 in GB

% selecting

Change vs 2023 >+5

Water supply +14

Local road network +7

Wind energy -7

Flood defences +8

Pavements +7

- Airports
- Rail infrastructure - track/stations
- Nuclear
- Solar energy infrastructure
- Pavements, footpaths, pedestrian areas
- Motorways/major road network
- New housing supply
- Digital
- Electric vehicle charging infrastructure
- Water supply and sewerage
- Local road network
- Flood defences
- Wind energy
- Cycle route/lanes/facilities

Water supply/ sewerage is also top in the U.S.

Q. Which of these types of infrastructure, if any, do you think should be made a priority for investment for [COUNTRY]?

Base: 23,530 adults (online), 32 countries
May-June 2024 - 1,001 in US

In the U.S., there has been much less change over time in public priorities

Q. Which of these types of infrastructure, if any, do you think should be made a priority for investment for United States?

Base: 23,530 adults (online), 32 countries
May-June 2024 - 1,001 in US

% selecting

N.B. no changes >+5 vs 2023

APPENDIX

METHODOLOGY

These are the results of a 32-country survey conducted by Ipsos on its Global Advisor online platform and, in India, on its IndiaBus platform, between Friday, May 24 and Friday, June 7, 2024. For this survey, Ipsos interviewed a total of 23,530 adults aged 18 years and older in India, 18-74 in Canada, Republic of Ireland, Malaysia, the Philippines, South Africa, Turkey, and the United States, 20-74 in Thailand, 21-74 in Indonesia and Singapore, and 16-74 in all other countries.

The sample consists of approximately 1,000 individuals each in Australia, Brazil, Canada, France, Germany, Great Britain, Italy, Japan, New Zealand, Spain, and the U.S., and 500 individuals each in Argentina, Belgium, Chile, Colombia, Hungary, Indonesia, Ireland, Malaysia, Mexico, the Netherlands, Peru, Philippines, Poland, Romania, Singapore, South Africa, South Korea, Sweden, Thailand, and Türkiye.

The sample in India consists of approximately 2,200 individuals, of whom approximately 1,800 were interviewed face-to-face and 400 were interviewed online.

Samples in Argentina, Australia, Belgium, Canada, France, Germany, Great Britain, Hungary, Italy, Japan, the Netherlands, New Zealand, Poland, South Korea, Spain, Sweden, and the U.S. can be considered representative of their general adult populations under the age of 75. Samples in Brazil, Chile, China, Colombia, Indonesia, Ireland, Malaysia, Mexico, Peru, Philippines, Romania, Singapore, South Africa, Thailand, and Turkey are more urban, more educated, and/or more affluent than the general population. The survey results for these countries should be viewed as reflecting the views of the more “connected” segment of their population.

India’s sample represents a large subset of its urban population – social economic classes A, B and C in metros and tier 1-3 town classes across all four zones.

The data is weighted so that the composition of each country’s sample best reflects the demographic profile of the adult population according to the most recent census data. “The Global Country Average” reflects the average result for all the countries and markets in which the survey was conducted. It has not been adjusted to the population size of each country or market and is not intended to suggest a total result.

When percentages do not sum up to 100 or the ‘difference’ appears to be +/-1 percentage point more/less than the actual result, this may be due to rounding, multiple responses, or the exclusion of “don’t know” or not stated responses.

The precision of Ipsos online polls is calculated using a credibility interval with a poll where N=1,000 being accurate to +/- 3.5 percentage points and of where N=500 being accurate to +/- 5.0 percentage points. For more information on Ipsos' use of credibility intervals, please visit the Ipsos website.
