

# Responding to COVID-19 in African Countries:

Data Deck of Polling Results: Nigeria

---

August 2020

# INTRODUCTION

The COVID-19 pandemic continues to impact societies across health, financial and day to day life.

This document provides the findings from public opinion polls in Nigeria to understand the public's knowledge, risk perception, attitudes, access to information, reactions, behaviors and practices related to COVID-19.

This Data Deck is supplemented by an Executive Summary of the findings by country.

# METHODOLOGY

The public opinion poll in Nigeria was conducted from 3 August to 17 August 2020. The polling was conducted by telephone.

Samples were drawn to be nationally representative of each Member State; weighting was applied by gender and region to align the final data with the population. The national unweighted sample size in Nigeria is 1,304 interviews.

# Additional Methodology Details

- The public opinion polling was conducted using a telephone interviewing methodology.
- The questionnaire was developed by Resolve to Save Lives, Ipsos and members of the PERC consortium.
- The polling program was approved by local review boards and all respondents gave explicit permission to participate in the polling.
- Note that where referenced, income categories should be interpreted as indicative as sample sizes vary and income reporting can be subject to bias.
- The weighted sample sizes for the demographic breaks in this report are as follows:

	Total	Male	Female	18-25	26-35	36-45	46-55	56+	Urban	Rural	Under 100	101 - 200	201 - 500	501+
Base: All	1200	624	576	304	571	265	46	14	526	674	316	337	195	97

- The percentages reported in this document may be different from percentages reported in other PERC products and communication of this data. Differences may be reconciled by investigating the denominator used, as indicated in each instance of use.

Partnership for Evidence-Based  
Response to COVID-19

# Awareness & perceptions

1

# Awareness

Q1. Before now, had you heard of something called the Coronavirus or COVID-19?

# Perception of the virus - % definitely true

Q2a-h. I'm going to read things people have said about coronavirus or COVID-19. Please tell me if you think each is definitely true, probably true, probably false, or definitely false. If you don't know, say so. (% Definitely true)
